The Cornell/DNS Post-baccalaureate Certificate Program in Health Studies is an intensive two-semester, 32-credit program. Required courses include anatomy, physiology, pathophysiology, advanced biology, nutrition, health, and the humanities, communication, and health care policy.

Electives of your choice complete the academic aspects of your schedule. You can explore possibilities for research and community service to round out your portfolio.

The Division of Nutritional Sciences is the academic home of the program. At Cornell, the Division of Nutritional Sciences is where courses in anatomy, physiology, and biochemistry are taught, so you can have these invaluable pre-health classes built into your schedule.

Cornell University is known for its academic rigor. Admissions committees at professional schools know what a Cornell experience is worth.

Cornell University leads the nation in the percentage of students applying to medical school. You will have the full attention of our highly experienced faculty and staff, who are dedicated to helping you reach your career goals.

Cornell University has a distinguished curriculum in health care economics and policy. To succeed in your career, you’ll need to be savvy about how U.S. health care is run and financed. Courses in this curriculum will put you ahead of the curve.

Professional schools look for students who are sensitive to cultural differences and aware of the many traditions in health care. The Cornell Post-baccalaureate Program’s core curriculum places these unspoken requirements front and center. You will learn anatomy, physiology, and pathophysiology in their historical and cultural contexts. Field trips to Cornell’s many cultural venues are designed to complement in-class activities.

One of the many things that makes this program unique is that participants enjoy access to Cornell’s vast resources, including the Herbert F. Johnson Museum of Art, where you can explore visions of health and disease across time and cultures.
