The Sloan Student Association (SSA) will focus efforts, both in terms of financial resources and human capital, toward the development of the Sloan student body. By aligning our goals within our three core strategies, the SSA will support the Sloan Program in recruiting and retaining the highest caliber of future healthcare leaders. The SSA will act as a critical supplement to the classroom curriculum in expanding the knowledge of the students.

Our three core strategies align with the goals of the Sloan Program as well as the Sloan Alumni Association (SAA). Together, all three parties will work synergistically to advance Sloan’s national recognition and performance.
Our synergistic approach to move forward and grow....
Working together with Sloan Administration & The Sloan Alumni Association

Professional Development:
The SSA will support students to engage in opportunities that complement the classroom experience and prepare them for their careers by:
- Hosting Fellowship Forums
- Creating and maintaining a calendar of upcoming events and application deadlines relevant to Sloan Students
- Hosting webinars with experienced industry experts
- Hosting workshops with respected professors from various Cornell colleges (Hotel, ILR, Johnson, etc.)
- Bringing industry experts to campus for our renowned Sloan Colloquium
- Supporting students’ efforts to join professional organizations such as (ACHE, MGMA, HFMA, AUPHA, HIMSS, etc.)
- Supporting students in participating in healthcare administration case competitions

National Recognition:
With our strategies of Community Involvement and Professional Development implemented, the SSA will solidify its National Recognition in the Healthcare Administration community.

With reinforced national recognition through improved presence at national conventions, conferences, and case competitions, we hope to recruit, retain, and prepare the world’s best healthcare administrators.

As the SSA, we owe it to our alumni, our administration, and our students to advance the Sloan Program in Health Administration to make it the best it can possibly be.
