## **RESEARCH INTERESTS**

---

I am interested in the causes of poverty, food insecurity and undernutrition, and the design and evaluation of interventions that would reduce these. I have also undertaken work on poverty dynamics, intrahousehold resource allocation, schooling, labour markets, aid allocation and on improving survey methods.

My current research interests focus on the links between economics (especially social protection, agriculture and gender), food security and human capital formation (especially early life nutrition). I have led or participated in the evaluations of some of the largest social protection programs in the developing world, including the Vulnerable Group Development scheme in Bangladesh, Brazil's *Bolsa Familia* cash transfer program, Ethiopia's Productive Safety Net Programme, *PROGRESA* in Mexico and South Africa's Child Support Grant. Throughout my career, I have been heavily involved in primary data collection through living in a mud hut in western Kenya and a small town near Timbuktu Mali as well as developing longitudinal and cross-sectional household and community surveys in Bangladesh, Cote d'Ivoire, Ethiopia, Guatemala, Kenya, Mali, Namibia, Niger and Zimbabwe. I have given more than 200 formal presentations of this work, as well as informal presentations in developed and developing countries to audiences including cabinet ministers, Canadian parliamentarians, members of the United States House of Representatives, senior officials in various governments and donor agencies, and village leaders in various African countries. My work has been cited in media outlets including *the Guardian*, *the Daily Telegraph*, *the Economist*, *Newsweek*, *the New York Times*, *Slate*, *the Times of India*, *Vox*, *the Wall Street Journal* and *the Washington Post*.
