CONCENTRATION: Design for Interaction

The MA in Design for Interaction focuses on shaping the ways in which people and designed artifacts interact. The MA cultivates designers who are attentive to the needs and opportunities of people and the context, striving to improve life, enhance places, and support the experiences of human beings within their physical, natural, and digital surroundings. Students are asked to grapple with an under-constrained, “wicked” problem or opportunity of living today through empathic research, and demonstrate the ability to create novel concepts, and develop and test experiential prototypes responsive to the given problem or opportunity. The culmination of the degree is a design / research thesis project that contributes to design knowledge. Typically, this is manifested as a prototype along with the written thesis reporting the design process and evaluation.

CAREERS

Students who complete the DI concentration with in the MA in Design will be well positioned for careers in a variety of interior design or UX design research professions within design firms, corporations, and tech companies.
